ORAK  
parasol

# ORAK parasol

by PATRICK NORGUET

ORAK is a collection designed by Patrick Norguet that reinterprets the parasol as both a functional and aesthetic design object.

The design aims to meet the basic needs of outdoor use while offering a harmonious and balanced presence within the space.

Thanks to its parabolic form, it integrates into its surroundings; it complements the character of the space without drawing attention.

DESIGNER

# PATRICK norguet

*"The elegance of a product lies in the quality of its details. At ORAK, we designed a family of parasols that not only fulfill their basic function but also enrich outdoor spaces. The parabolic form, which doesn't intrude on the space, achieves a balanced appearance thanks to the attention to detail. The color and material choices were designed to offer a wide range of harmonious combinations to suit different spaces,"* explains Patrick Norguet.
